

# SUBTROPICALS

## INTRODUCTION

New Zealand enjoys a unique temperate climate suitable for growing a wide range of subtropical fruits. Many were initially grown on a cottage, backyard industry basis but strong international demand has driven commercial production.

Our subtropical range includes tamarillos, passionfruit, feijoas, figs and persimmons. Freshmax offers all these sub tropical fruits for sale in New Zealand and to all corners of the globe by air and seafreight.

## AVAILABILITY

Feijoa	April to May
Figs	March to May
Persimmons	May to July
Passionfruit	January to July
Tamarillo	April to November

## PACK TYPES

Packed to meet individual market requirements whether for NZ or export orders. Single Layer trays or cartons, with pocket packs, to ensure fruit arrive in optimum condition.

Growing Region	Subtropicals are mainly grown in the North Island in the Far North, Auckland, Bay of Plenty and Taranaki regions and the top of the South Island. We secure continuity of supply by sourcing fruit throughout each season from complementary growing regions.
----------------	---
