

# VEGETABLES

## INTRODUCTION

We are passionate about the supply of high quality, fresh vegetables to the leading New Zealand retailers all year round - freshness is our key priority, having products picked, packed & delivered to our customers within 24 hours. Greenz, our vegetable export division, specialise in exporting squash and pumpkins, available from January to the end of April. (Please note Greenz also export onions which is in a separate product category).

Yams												

**Domestic Vegetables: Availability Chart**

## DOMESTIC

Freshmax has fresh markets strategically close to the main vegetable growing regions in New Zealand: Pukekohe is close to our Auckland market, Horowhenua to our Wellington market and the Canterbury region supplies both our Christchurch fresh markets. Nelson, Oamaru, Hawkes Bay, Manawatu to name just a few, are smaller vegetable growing regions throughout NZ. The vegetable range which we offer domestically covers over 70 lines – the best format to represent these is an availability chart which is shown above.

Vegetables are packed into loose and pre-pack formats to meet individual customer requirements. Loose product is packed into crates and bulk bins for the domestic market.
